

ON-SITE RECORDS PROTECTION
Guard against Fire, Water and Theft

WELCOME TO THE WORLD OF PHOENIX FILES AND SAFES

Ask any Phoenix customer whose documents and data have withstood a fire and the water to put it out: Not all files and safes are created equal, and none rival the protection you'll get in products from Phoenix Safe International, LLC.

Phoenix distributes a full line of safes and files offering on-site records protection from fire, water and theft. Our products offer superior, independently tested protection to guard your valuables against the worst disasters. And with a variety of sizes, styles, finishes and colors, that cater to most designs and décors.

Phoenix has protected valuables since the 18th century. Originally known as Richmond Manufacturing, the company's origins were in maritime carpentry for merchant fleets sailing to America from Liverpool, England.

More than 200 years later, we launched Phoenix Safe International as the company's American arm. We personally present Phoenix to independent office product dealers nationwide, and our efficiency lets us give our customers legendary, one-on-one customer service when they need it.

In this catalog, you'll find a wide range of files and safes — supported by our inventory of nearly 2,000 quick-ship items, rigorously tested to meet the highest standards of protection and attractively designed to appeal to any customer.

Thank you for considering Phoenix Safe International, where protecting your valuables is our burning passion.

Test Specifications

Fire Test Standards

Each Phoenix fire-resistant model is independently tested to European or American standards for fire protection and carries certification labels from the testing agency that identify the product's fire protection level.

Products for Storage of Paper Records: Products that provide fire protection for paper records are listed in this brochure with the designation of "Class 350." Tests for products designed to protect paper records range from 60 to 120 minutes in temperatures ranging from 1700°F to 1859°F. By comparison, a typical fire lasts 20 minutes and reaches 800°F. During the fire test, the internal temperature of the product is monitored to ensure that it does not rise above a level that would endanger the paper documents stored within the product. *The designation tag also indicates the length of the fire test as "1 HR, 1 ½ HR, or 2 HR" and is located next to each model number.*

Products for Storage of All Computer Media: Products that provide fire protection for all types of computer media are listed in this brochure with the designation of "Class 125." Tests for products designed to protect computer media range from 60 to 120 minutes in furnace-burn time, at temperatures ranging from 1700°F to 1859°F. By comparison, a typical fire lasts 20 minutes and reaches 800°F. During the fire test, the internal temperature of the product is monitored to ensure that it does not rise above a level that would endanger the computer media stored within the product. *The designation tag also indicates the length of the fire test as "1 HR, 1 ½ HR, or 2 HR" and is located next to each model number.*

MTC Grade B Rating

Certain types of computer media (CDs, DVDs, USBs and memory sticks) are less sensitive to heat and humidity than tapes and cartridges. These less-sensitive items can be safely stored and protected inside some products designed to protect paper records. Products that carry the MTC Grade B rating have been tested and certified to provide adequate protection for these items. Products that are rated "Class 125" are designed to store and protect all types of computer media and should be used whenever the more sensitive items need protection.

Key to the protection labels found throughout this catalog.

Fire Protection

Rigorously tested to protect paper documents from fire

MTC Grade B Rating

Protects certain types of computer media (CDs, DVDs, USBs and memory sticks)

Data Protection

Class 125 protection for all computer media

Theft Protection

Independently rated to deter theft

Explosion Protection

Designed to withstand temperature blasts of up to 2000°F

Questions?
800.636.0778

*Nothing destroys pasts and
threatens futures faster than fire.*

Nothing protects them better than Phoenix.

Fire is the most common disaster to befall businesses, forcing nearly half of those affected to close forever. Vital records and data can also burn up in minutes, irreplaceable through insurance.

Phoenix fire files save you from that stress — durably built to endure the harshest fires, attractively designed to fit many décors and readily available in the sizes you need.

All Phoenix fire files are tested at temperatures up to 1700°F and keep paper safe from the deadliest fires. Our proprietary insulation is independent to each drawer, protecting closed drawers even if one is left open. Inner steel jackets guard against theft via unlocked compartments and keep insulation out of documents, locking mechanisms and suspensions. And labyrinth sealing systems further defend documents from water used to extinguish fires.

Plus, Phoenix World Class files protect digital media — with extra insulation and moisture barriers to guard memory sticks, hard drives, CDs, DVDs and USBs.

Phoenix files are as stylish on the outside as they are sturdy on the inside. Available in lateral or vertical sizes, their modern design assures a perfect fit for your home or office.

You can't predict fire, but you can plan for it. With Phoenix fire files, you're guaranteed to preserve your past and your future.

INTRODUCING WORLD CLASS PROTECTION

Meet the future of fire and water protection with World Class files from Phoenix.

True to its name, the World Class line blends the best of all Phoenix has to offer — rugged endurance to withstand the toughest disasters, eye-catching styles that fit in anywhere and the features you need to personalize your protection.

World Class files are available in legal-, letter- and lateral-size models.

And of course, World Class files stand up to the harshest fires and the water that puts them out. Each file is rated to protect your documents from intense fires, while a labyrinth sealing system and special gaskets prevent water damage from sprinklers and fire hoses.

*The features you want.
The style you prefer.
The toughness you expect.*

**Welcome to World Class
fire protection from Phoenix.**

PHOENIX FIRE FILE FEATURES

Phoenix World Class fire files work from the inside out to safeguard your records. Here are some of the individual parts that add up to unparalleled protection for your paper documents and digital media (CDs, DVDs, USBs, hard drives, and memory sticks) from fire, water and theft:

- 1 Solid, one-piece steel construction of the outer body provides superb durability
- 2 High-sided drawers and adjustable rails allow hanging-folder filing
- 3 Movable dividers accommodate standard folder filing in vertical files
- 4 Key-operated plunger lock ensures privacy
- 5 Proprietary Styronite insulation ensures a world-recognized **certification of Class 350 – 1-hour fire protection from Europe's prestigious SP Institute; files are also explosion- and impact-resistant**
- 6 Independently insulated drawers protect closed compartments if one is left open
- 7 Inner steel jackets prevent access from unlocked compartments and insulation from touching your documents
- 8 Labyrinth sealing system and special gaskets prevent water damage from fire-hose spray or sprinklers
- 9 Lock-bypass mechanism allows selected drawers to remain unlocked, even when the file is locked
- 10 Recessed latch handles ensure drawer is closed when you hear "the click"

- Height, width and depth measured in inches.
- Internal dimensions are per drawer.

Lateral Files

Combining powerful protection and aesthetic polish, World Class lateral files cater to heavy-duty storage needs. Each drawer is equipped to handle legal- or letter-sized folders from front to back or side to side. Drawers also use a three-way suspension for stability and feature an anti-tip safety mechanism that prevents opening more than one drawer at a time.

- Labyrinth sealing system and special gaskets prevent water damage
- Two- and four-drawer vertical models; two-, three- and four-drawer lateral models
- Durable textured paint finish in black, putty or light gray
- Recessed drawer pulls
- Lock any number of drawers and leave the rest unlocked for customizable privacy
- Key-operated plunger lock for security
- Independent drawer insulation protects closed drawers if one is open during a fire
- Inner steel jackets cover insulation and block access via unlocked compartments

Phoenix safes protect your documents and peace of mind.

Talk about a perfect combination.

Phoenix safes let you enjoy unrivaled safety and security in any location. Lock a laptop in a dorm. Protect personal documents in a den. Take precautions for cash at a business. Whether you're guarding money, records, electronics or data, we've got the safe for you.

Our Fire Safes shield belongings from the hottest fires for up to two hours. In our Cashier Deposit Safes, solid steel provides immediate security to safeguard goods and money.

Double-door construction and water-resistant seals on our DataCare Safes are specially built to protect media and data. Many of our models feature easily programmable, user-friendly digital electronic locks.

No matter what type of thief is trying to do its worst, a Phoenix safe is always at its best.

MEDIA SAFES
